# NPDC's Draft 10 Year Plan

Office Use Only: 348

**Submission No: 101**

**Jeanine Fowler**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Do it once and do it properly. Make sure you get value for money so when tendering check the quality n specifications. Cheap will be expensive inthe long run

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

Offer significant incentives for ppl buying front loading washing machines. This will save you 200 ltrs per wash!

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Teach ppl to clean their gutters n drains BEFORE we get heavy rain. Not try n fix the problem during or after

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Would like you to consider when extending to make the trail user friendly for all. Eg make wide enough for bikes to pass parents walking with little kids on their balance bikes. AND also put a digger bucket width on the side for horse riders. (No extra cost as they only need space n dirt to walk on) You have the digger there to start with and you have an immense amount of horse riders in your district. They can then also access beaches. This works very well on every large trek through the country where horses share with walkers n bikers without any issues. It also aids in ppl understanding eachothers needs. What an amazing thing to do to be able to ride safely around the coast and gives a nice change from the mangamahoe bridle trail, where you will one day cut down the pines, rendering it difficult for horses n heavy machinery.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Most of it is already done by farmers. We planted 20.000 native trees at a Cost of 100.000 through planting schemes and paying clubs donation per tree as their fundraiser. So... plant trees by all means. Make them native so they never get removed and carbon credits stay in place. Maintenance is minimal. Fencing does not need millions of \$\$, work in conjunction with TRC. You can do better and more cost effective rather than just accepting the quotes you obviously got. Put your own thinking caps on, and operate the council as a business, think for yourselves and utilise what you've got. Happy to show you our results.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

We have enough sporting facilities. The stadium is one huge under utilised one. You struggle to up keep halls and schools have gyms. Really feel the racecourse should remain open space as it will become an important area when needed by civil defense. You need somewhere that can accomodate large crowds with cooking n toileting facilities.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 349

**Submission No: 102**

**Lorna Mckenzie**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 351

**Submission No: 103**

**Blair Crowley**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

We need this to boost our local sporting stance to catch up with the rest of NZ. We have gradually declined in many sports and having better facilities will help claw back what we have lost. We need things like indoor tennis courts to attract bigger and better sporting events and also grow our local talent and increase numbers in sports!

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

To enable Taranaki to align themselves with bigger centres and to ensure our people have a facility that will enhance wellness in the community, accessible to all and provide for all codes in the community. It is crucial that a "hub" is developed the sooner the better. This would also encourage sporting events to the region, improving financial gain from visitors as well. We have a regional sporting trust with the capability to administer and provide expertise to the hub. This would be a win/win for the whole region.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Very important we need good drinking water.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

We cannot keep using water the way we have been. Get it fixed.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Not so important.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

There is no urgency for this. Not happening.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

No need just keep the ones we have up to scratch.

---

### **What else?**

Only spend money on essential things that we all need to stay alive.

# NPDC's Draft 10 Year Plan

Office Use Only: 371

**Submission No: 115**

**Paul Duynhoven**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

Do it now. If you wait it will be far more expensive.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Doc needs to come to the party to fix the tracks on the mountain/national park.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

Wait until the tech is better before electricifying the fleet. \$200,000 per year for 10 years seems excessive. A community project planting project 1ha per year with the council funding seems a better option to me.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

The multi-sport hub is a danger of being a white elephant due to it not being fit for purpose or fully adequate for any of the applicable sports. Major congestion issues due to not being easy to get out of in heavy traffic. If a 2nd indoor stadium is needed that makes sense to have it there but netball courts and parking etc would be better served having a purpose built facility at Hickford Park, Bell Block.

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Do it once, do it right and save money in the long run

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Again, do it once do it right

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

**Chris French**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### *Comments*

This shouldnt be called "saving" water. It is about "conserving" water. This is a subtle but important difference.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

### *Comments*

I believe this should be achieved through green infrastructure design which will achieve both improved stormwater management and a more enhanced urban and natural environment.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### *Comments*

The Huatoki track is in desperate need of upgrade and repair, especially to reopen the currently closed section. It feels like this has been forgotten in lieu of other trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 376

**Submission No: 119**

**Samara**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

Focus on fixing water and sewers. Don't worry about stormwater

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

Don't just focus on the money. Our rivers are more important than the bottom line.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Waitara should have invested in this when it was built. Stupid place to put a town. Maybe consider red zoning some of it rather than throwing money at it, and what about climate change impacts?!

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

Traverse sounds way more interesting than the not-very-coastal walkway to Waitara. I get they need to be connected but it's a lot of money for little gain. Also, what about finishing off the Waihowaka walkway in Bell Block and some of the other "almost there" walkways around the place first.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### ***Comments***

This is barely sufficient. Planting our Place is great, but the target is lackluster. How about doing that over 5 years?!? Where's the commitment to combatting climate change? Stop mucking around on plans and get action going.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

If you have to do it, then sports should pay for it all. Money better spent elsewhere. And have the guts to chuck the racecourse out not half-arse and build around them

---

## What else?

Transitioning our economy away from oil and gas is THE BIGGEST ISSUE but you have nothing here about it?! You say Bell Block is the fastest growing area but then you don't plan to do anything about it. Our services are luckluster, you say you've tossed out plans to upgrade the library out here, the pool needs a revamp, the traffic is crazy, hickford park is left to some farmer to use and not accessible to the rest of us (and he pollutes our air with fertiliser smells). No community board. No care, just a rates cow for you to milk. How about a some action out here, and come talk to us.

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### **Comments**

Money spent in this area really connects communities and has really good payback. I would like a connection between Hawera and New Plymouth (bike/walking trail off road)

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### **Comments**

Need to be at forefront of changes been made.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### *Comments*

The hub needs to happen. More artificial turfs need to be built into the design plan of the hub or other venues. Despite Taranaki having great grass growing - we need to use artificial pitches for rugby, football and other winter sports. Get better use- current parks are extremely under utilised (eg Vogeltown park), because grass can not take high use in winter. One artificial turf with lights is worth about 20 grass fields. You could turn over the under used fields into community housing! Even at high performance level this should happen at Yarrows Stadium - the technology has improved. If good enough for Racing Club Paris, Saracens London, or even Memorial park in Masterton why not Taranaki rugby. For such an expensive asset to be off limit to community (say for football U17 world cup or RWC2011) because of fear of the fields would be damaged. Also you could have more extended club and community days from small juniors to seniors as in Australia. For example football on a Saturday, rugby on a Sunday and league on a Monday, touch on a Tuesday night, and hockey on Wednesday - on same field. I support a venue that is high cost that will bring marquee events in (including concerts) but it also needs to be utilised. Why not build the hub at Yarrows stadium. Less congestion than racecourse but still a close location. I can see the racecourse location causing significant traffic issues on big days. The only draw back with a hub is ensuring existing clubs are not destroyed by the merging of facilities - I have seen this drop of community participation and club spirit by playing all matches at a central location (eg Tennis Central in Wellington Renouf centre. It helps high performance kids but has destroyed the participation player base)- why join a club to volunteer etc

---

### What else?

I understand I have supported alot of high price projects, but investment in these areas will make New Plymouth a more attractive to live in, and likely lead to a greater rateable base (or prevent a sinking one) to ensure the costs to all ratepayers remain manageable

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

People won't be able to afford to live if you put water meters in.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### Comments

Although i agree that water meters is the right way for people to be careful with their water usage, i still think that each residence should get some quota of free water. NPDC has a method to calculate rates, so NPDC should be able to provide free water from the rates residents pay. There are people who live in big houses with rates but they may not use that much of water and they always try to save. There are also people who live in smaller house but over crowded and use a lot of water. This is the time to make them aware. Also there are people who own a swimming pool that NPDC made them pay higher rates although they didnt use the pool and never refill the pool

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

### Comments

I agree with investing some fund but if the first stage requires \$20 million, how much more fund will be required later. If the cost is too high, then why Parts of Waitara have been built on very low lying land beside the Waitara River from the first place and will that be continued ? Why NPDC allowed that if it will cost more in the future?

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

The faster, the better.

---

### **What else?**

NPDC should fund more to teenagers other activities too, such as through school initiatives or anything to give them something good for their life. Lately, I have seen more and more teenagers out on street, some how look like a gang and from NP community Facebook page, there are more and more crime reports. We should make NP grows beautiful both in terms of places and people. There should be more security system in place too. Car theft is everywhere, and other type of theft too, how should we have more green but people won't feel safe to enjoy or go out for it.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### Comments

Keep water on rates and have meter rate kick in after a allocated volume that way people will naturally save and those that don't a high price can be put on the metered amount. Additional water storage should still be looked at earlier than needed otherwise a saving now may just be delaying the problem with population growth ( doesn't have to be the councils problem personal water tanks may help)

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

#### **Comments**

In my opinion being a rates payer, it shouldnt all come from us, why should we fund every plan the council has.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Theres alot of houses in newplymouth, and whos paying for the meters ?do we get put on a plab to pay for them ? if the council thats more money for something that isnt necessary and how does it work, rates would change every week based on water usuage.I wouldnt pay for one, Not thought through enough to be honest.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

#### **Comments**

That should be tapped onto the waitara rate payers not newplymouth. We dont live there, so why should we fund it

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

i dont agree with a walking track from mountain to sea, why not. a gondala ? charge \$100 to ride it brings in revenue to cover the cost, and gives tourist's something else to do.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

How many cars in the fleet ? jeepers, think its time to maybe have electric bikes or better yet use the scooters that u charge around town. I agree with the trees but not the fleet, mayb have 3 in the fleet but not everyone needs a car, just share them otherwise bike or carpool or take public transport

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

If it is open to EVERY sports team including school children sports then im on board. If its just for the rich/ professional teams/ or the "top" teams then hell no, i disagree. i have a daughter who plays outdoor netball and if its raining (usualy it is) would be nice to have a place they can play their game without being saturated and getting sick.

---

## What else?

ROADING ! now that is and should be a top priority. Our roads are shocking nad the product thats being used is a quick fix and doesnt last and people leaning on shovels most of the day doesnt help. Roads need to be bought up to spec, and tougher long lasting tarseal needs to be used. We pay tax on food, luxury items, cars, and anything else we buy, so think its time our roads looked and were better then rhe walkway,and as for the lyn lye centre that is a black hole, if it cant stay open with its on revenue then it should be gone, its a waste of money every year,you go there once and it hardly changes, kids think its boring. What about opeing a dog park ? we pay a rate for owing them too, they desirve a place to hangout, mingle with other dogs and be a safe haven for them away from the people who dont like animals, where they can be off leash and have a good time.

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 441

**Submission No: 151**

**Lois Parkes**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

We get adequate rainfall here in Taranaki from rain, rivers etc and our mountain. The system is old and tired and the water catchment method needs to be upgraded to store water more efficiently especially during the dry months. Water is an essential commodity and benefits everyone. Water meters are unavoidable as time goes on, but citizens are reluctant to part with ongoing rates inflation, percentages of rates increase are going up more than most people want. Would they be paying the rates increase AND water costs as per usage on the meter? THIS IS A PRIORITY ISSUE IN OUR AREA. More important than extending walkways and providing more leisure activities. People seem to be focussed on pleasure rather than essentials

---

## Saving water and water meters

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

We have enough in this area and is not essential to add to it at this stage

---

### Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### *Comments*

Planting trees is always a good thing. The expense of upgrading fleet vehicles in the name of the environment is not necessary yet

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

There are enough sports venues where the users and club members help to fund rather than adding more costs for a large proportion of residents who will never use them

---

### **What else?**

It is very difficult to suggest changes, improvements and issues to the council. Many councillors are reluctant to change old ways. A survey regularly like this a few times a year in with the rates demand would be great.

# NPDC's Draft 10 Year Plan

Office Use Only: 443

**Submission No: 152**

**Eddie**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### *Comments*

Only include meters in all new subdivision. If water meters implemented than maybe a rebate for using less water.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### *Comments*

Encourage large land owners to plant % of land in high CO2 absorbing trees. In all new subdivision and developments allow a % for area to be planted in trees. Even between properties. In on them

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

I am worried that rugby and BHS will dominate the field spaces. Make the fields junior sizes like in Whangarei. More tunnels to access venue under the raceway to allow more access. We need to look at moving from all outdoor sports are Sat am model and use this more. The turf should only be football not rugby as rugby as lots of great venues. With indoor venue should be split into 2 buildings with 3 courts each like Palmerston North. This caters for different sports on same nights and also could use in pandemic.

---

### **What else?**

Please do not price the use of venues too high that means kids can not avoid it and then we do not maximise use of sport venues. Also Bell Block has a lot of land that can be used for indoor sports based.

# NPDC's Draft 10 Year Plan

Office Use Only: 445

**Submission No: 153**

**Graeme James**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

The problem has built up over a long time therefore makes sense to part fund from long term debt

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

We have great natural assets that are underutilized. We need to be an outdoor pursuits destination

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

#### **Comments**

Sport facilities are hugely underinvested. This impacts thousands of families every week and prevents us hosting nationals and regional events

---

## What else?

Thanks for allowing the feedback. Would have been nice to be asked for such transparency when you made the decisions on the rugby stadium repairs.

# NPDC's Draft 10 Year Plan

Office Use Only: 447

**Submission No: 154**

**Tim Wilson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Has anyone suggested trenchless pipeline solutions? Like a cured in place pipe. Would cause significantly less disruption to our city streets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

All properties need to have a meter if they have a water connection

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

We need to future proof our projects so we don't fall behind in our infrastructure. We live in a place that is becoming increasingly popular and more people are making a conscious decision to live here so lets be proactive and build our infrastructure projects so they will be able to cope.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

We have such a fantastic track network for the size of our city. Lets keep building on this asset. The mountain to sea track is a perfect opportunity to build on domestic tourism and would no doubt contribute to our economy by drawing in people from outside the region.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

We don't need to adopt the extremist views on climate change the labour government have. As technology improves we should adopt it. A fast, forced change could end up costing a lot more money.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

The sooner its built the sooner they will come, with a new facility we can host events and it starts paying for itself and contributing to the local economy sooner. Building is only getting more expensive every year so the sooner it happens the better

---

# NPDC's Draft 10 Year Plan

**Peter**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

Essential services come before tracks & trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

Rates are starting to be a burden on weekly expenses without being a open wallet for every dreamer that wants something in the community at the rate payers cost. Extra's should only come after essentials are paid for, or use some of the \$300 million of investment money to pay for extra's. What ever happens generations will be in debt otherwise with spiraling upwards rates.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

There is a big need for this. Current facilities are not up to scratch and the hub would bring in a lot of income to the region and add massive value to the city. We are way behind other cities in this area. Would prefer this over doing the coastal walkway extension

---

# NPDC's Draft 10 Year Plan

Office Use Only: 469

**Submission No: 167**

**Alex Quinn**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### Comments

Rather than water meters, encourage home water storage of rain water. Provide support to install water storage options

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### Comments

I do not support the Waitara extension. I don't think it adds value to the community. Use the Waitara extension funds to speed up construction of Maunga to Sea traverse. This will add tourism dollars

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### Comments

Happy for the planting. No to the electric vehicles. The technology is way too expensive at the moment. Wait until the tech becomes cheaper (it won't take long!)

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

STOP the stadium renovation. Use these funds to invest in the multi sports hub

---

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

We need to encourage activities within our community. For every dollar spent on being a healthier community how much do we save on medical health expenses?

---

# NPDC's Draft 10 Year Plan

Office Use Only: 475

**Submission No: 169**

**Brian Clarke**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

I would be fine having water meters if the cost of paying for water is offset by a reduction in rates. Unfortunately, the NPDC has no intention of doing this. In fact quite the opposite - water meters (paying for water) AND an outrageous increase in rates. How does the NPDC expect households to pay for all this?

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

This is a "nice to have" and can be put on hold, until the essential infrastructure (e.g. water) is completed and paid for. NPDC needs to put the ratepayers first in their decision making and always look for ways to keep rates increases down. This will mean prioritising spending.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

Same comment as before. A 12% rates rise is outrageous. NPDC needs to put ratepayers first in their decision making and make hard calls that will reduce spending.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Develop a sports hub but NOT funded by rates (or pay for upkeep only). NPDC needs to get creative about finding money to pay for this. Look to business sponsorship, government grants etc.

---

### **What else?**

A 12% rates rise followed by annual 6% rises is outrageous and unacceptable. I cannot express in words my disgust that such increases are being proposed by NPDC. How do they expect households to pay for this? Who is getting a 12% pay rise to pass the increase rates? Already strained households will have to cut essentials to pay rates. NPDC needs to think of ratepayers first and consider the financial burden they are putting on the people they are supposed to serve. All I can do is comment on forums like this and vote accordingly in the next council election. I can assure you that if NPDC continues with this, any councillor that agrees to this rates rates will be ranked at the bottom by me!

**Natasha Woller**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

We have water. Huge rainfalls that goes uncollected. Collect it. Subsidise water tank installations on new builds or new subdivisions. and even older homes. People would prefer to pay off a water tank opposed to a water meter. Don't install water meters people are already struggling to make ends meet as it is.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### *Comments*

Great idea for planting as long as natives.. Will need on going permanent funding to maintain the new planting from invasive weed species etc.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

This is a want not a need. Our region already has plenty of sports facilities. I propose investing that Money into our roading and water problems

---

### **What else?**

Focus on keeping what we have well maintained before using more expenditure on the wants. The walkway is popular with locals and brings tourism. So extending that is a no brainer. It's proven it's great. But we don't need the sports hub. It's an expense that could go into what we do need water plus roads plus parks maintaining Plus new planting maintaining etc etc

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

The sooner its done the better but have excellent project management to ensure any work comes in on budget. Councils have a bad reputation of dragging the chain and going over budget There should be penalties introduced to companies doing the work if they don't meet the milestones implemented as part of the project, this should help to keep all parties honest.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Water is now a commodity like anything else and users should pay but saving water is also important. Collecting water for your garden use should be encouraged.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Don't have enough info to make that decision

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Definitely do the walkway but never heard of the traverse before so maybe tracks and trails need more advertising to encourage more use?

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

What are the cost savings of electrifying the fleet including lease costs not just running costs.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

What are the advantages of a multi sports hub. With covid now it seems more prudent to have the facilities separate as they are now. Too many activities in the one place is a disadvantage.

---

## What else?

Develop the Todd Aquatic centre to have year round use of the outdoor pool, move the cafe to the seaward side of the complex

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

The benefits of fixing / replacing plumbing out-weigh what will eventually happen if the problems are ignored, as Wellington is finding out.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### *Comments*

My ultimate dream is for putting tracks and trails at the forefront of leisure and commuting with a corresponding decrease on the emphasis of car / truck transport. To achieve this a complete rethink and attitudinal change would be required as happened in The Netherlands (starting in the 1960s) and as is now happening in Manchester and Leeds, UK and various Scandinavian countries. At the very least, extending the Coastal Walkway to Waitara and developing the Taranaki Traverse will bring untold benefits to Waitara, and the whole region in the form of health, better commuting options, individual and family/whanau welfare and enjoyment, and linking up tourism throughout the region. Wanting to feel safe while walking/cycling is high on the list for many people (and is a reason given for people not cycling regularly. High quality tracks and trails ticks too many boxes to not proceed. Combined with these extensions would be an increase in secure bike parks.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.  
NPDC's preferred option.

---

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

I do not support the water infrastructure being taken over by central government, as proposed through media. Central government is bogged down in bureaucracy already and takes far too long to get anything done or a decision to be made, that this would be a disaster for our community.

# NPDC's Draft 10 Year Plan

Office Use Only: 492

**Submission No: 179**

**Clare Rinckes**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### Comments

Ratepayers should not be funding the cost of water meters and water conservation initiatives in order that developers do not have to pay for new expensive infrastructure for their developments. The ratepayers should have the benefit of a system with redundant capacity which continues to operate effectively under climate change. I appreciate this is proposed, and I want to support this intent.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### Comments

I think the preferred option for Climate Action is lightweight. I am hoping the council is ensuring further developments are not occurring in low lying areas or areas exposed to coastal erosion. I would like to see more work and action at the Council level on the Climate Emergency.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

The New Plymouth and Taranaki region are facing economic uncertainty due to covid-19 (which has not gone away) affecting the income of many businesses, and reduction in Oil and Gas income and Dairying income due to Climate Emergency actions. This is not the time to hit the ratepayers with discretionary recreational options. The airport is struggling to pay for itself due to covid-19 restricting travel, and the previous airport would have met our needs for a few more years. We should wait before committing to another expensive development.

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

It's such an important issue, I can't fathom why Council allowed the backlog, hence the expensive fix. Why is there an Option 1. Do nothing, ridiculous.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Sewage in Urenui is more important

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

#### **Comments**

Maori would never have abused there land

---

## **Developing a multi-sport hub**

### ***Comments***

Urenui sewage is more important

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### Comments

While I've lived in areas with water meters all my life (lived in Melbourne before moving to NP), the biggest problem was privateering the water, the water cost a massive amount and increased yearly! This will be especially difficult in a climate where the current government are doing jack all about the "non-existent" housing crisis. I'm fortunate enough to own a property but with rent being common around the \$400-\$600 a week mark, lower income earners are going to absolutely struggle... It would be interesting for the council to come clean on the true figures of the last 20 years of how many people have moved here compared to how much the water storage capabilities have increased... and if it hasn't increased explain why, for example; was it because of environmental groups preventing large storage facilities because of their "beliefs" which is exactly what happened at times in Melbourne... if it hasn't increased more than the number of people moving here; it was simply a lack of attention from the council point of view. Time to be truthful with actual figures to gain the trust of the residents in this great region.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### Comments

Having rode on the coastal walkway everyday for years, it's a great track. Extending this would be excellent. I now live in Westown and can still get to the coastal walkway easy enough but making a dedicated path that direction may get more people just starting, out and about in that area!

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

I've gone for option two however suggest keeping away from electric vehicles and targeting hydrogen powered vehicles to coincide with the federal governments push to have Taranaki the hydrogen centre of the country! Taranaki will need this and the workers (including me) who could lose there jobs because of the loss of oil and gas will depend on Hydrogen in our future! Time to support the majority of the community, gain the trust and go for hydrogen! Without the oil and gas industry and even a hydrogen future NP won't have decent money to worry about the future for this survey to make any difference... time to gain the trust of the residents!

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

This is brilliant, without reading too much about what has been planned; I played basketball all my youth and think it would be excellent for the region to have a single location where there is a huge number of activities that can be done with ease. Staging country wide basketball/netball tournaments in NP, even soccer and tennis. Coming from Melbourne we were spoiled for choice with sporting events, the AAMI stadium for example was a soccer field normally but holds yearly events of Monster trucks and motorbikes doing jumps etc in the stadium, this would be amazing to see in NP!

---

## What else?

Just please read my other feedback, feel free to call or email me should you want further info. Target a hydrogen future to save the regions work force, without farmers or the energy industry this town doesn't have much left and I fear for housing prices should anything happen! Governments tend to tell the world we can change in 10 years time, in the engineering world 10 years is not long at all! Especially when overseas investors are not confident in the country, where will our money come from? Take Ballance Agri-Nutrients for example, they were just about to sign off a new more efficient plant (great for exports) then Jacinda Ardern announced no more exploration, their investor quickly backfired and canceled the deal due to lack of confidence of getting their money back...
