NPDC's Draft 10 Year Plan

Office Use Only: 3883

Submission No: 1701

Jasen Hesseltine

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3887

Submission No: 1702

Conrad Murray

Organisation: Multiple Outdoor Recreation Organisations

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3896

Submission No: 1703

Annette Conroy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

NP is about to expand rapidly . Upgrades on water utilities needs to be done

Saving water and water meters

Comments

No water meters unless the savings are passed in to residents.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara is expanding. Storm water utilities need to be improved

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

New Plymouth and it's surrounding areas are beautiful

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Keep the trees and plants native

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Sports are low priority and a niche interest . There are other far more important matters to be looking at.

What else?

Build up NP's cultural and environmental amenities. Our utilities are also important. Waitara needs upgrades in all the above

NPDC's Draft 10 Year Plan

Office Use Only: 3900

Submission No: 1704

Lloyd Morgan

Organisation: Taranaki Synthetic Turf Trust

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The need for significant sports infrastructure upgrade for the use of the wider community has long been identified. Some sports rightly argue the Council has been seriously remiss in supplying facilities, particularly in light of the wider participation in non traditional sports. Developing such infrastructure at a accessible central site is pragmatic and efficient. Inflationary pressure around building costs, plus the pressing need for such a resource make fast tracking this development essential.

What else?

NP district, and all of Taranaki are blessed with some unique features. Any way to encourage appreciation and use needs to be promoted.

NPDC's Draft 10 Year Plan

Office Use Only: 3902

Submission No: 1705

Jane

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3905

Submission No: 1706

Mike Galloway

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Hold back on these vanity projecincreases now. They are great for our province. but post covid, and the current housing boom people are feeling the pinch. Help the people. Less living costs not more via rates increases

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

It has to be done

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Get it done make it fast. But do it right. Accommodate for more. Rock climbing. Ninja worrier. Dance, bboy etc. The stuff that doesn't usually get a look in

What else?

Hold back on vanity projects for now. They are great for our province. but post covid, and the current housing boom people are feeling the pinch. Help the people. Less living costs not more via rates increases

Submission No: 1707

MH Wells

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

get sewerage from urenuui done .borrow money while its cheap.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

it will cost more to fit meters than you will ever save.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3916

Submission No: 1708

Teegan Dempster

Comments

Tracks and trails bring tourists to Taranaki and that is the direction NZers are taking for holidays

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The facilities at Pukekura Park are not up to standard and need to be included in the LTP to insure first class cricket continues to be played and one of the worlds most iconic cricket grounds in the world. The changing rooms are well overdue for an upgrade and this will be needed to keep 1st class cricket being played at this venue. Would be nice to link the sport hub and Pukekura Park through a road from the eastern corner of the park. This would allow the road to removed on the western side of the ground.

NPDC's Draft 10 Year Plan

Office Use Only: 3918

Submission No: 1710

Errol Pascoe

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

Steve Mclellan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

No.its waitara.who cares

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Ban 1080

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Climate change what a joke

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Why.dont we have sporting facilities

What else?

Ban 1080

NPDC's Draft 10 Year Plan

Office Use Only: 3924

Submission No: 1713

Angie Benn

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Balance spending here with roading improvements in partnership with Waka Kotahi NZTA. Traffic congestion and flow is becoming a real concern for both safety of road users and current population and projected population growth.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

This is an issue in Waitara and needs attention but there are other areas stormwater concerns eg. Lepperton. Can we balance spend to also include other districts facing the same issue.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Some existing Mountain tracks are needing attention, I hope plan is to maintain what we have currently developed in combination with new developments. Please include lighting in developments of Coastal walkway. We would love Lepperton to be included in Mountain to Sea tracks.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

I am keen to see plan for where planting is planned and hope that there is provision for planting along the Waiongona River in Lepperton.

Developing a multi-sport hub

Comments

I don't support rate payers money being spent and would like to see fundraising and other options for financial support investigated. I believe the Waitara Hub was funded independently.

What else?

Please can we have a public toilet in Lepperton on our Open Space in this LTP, this has been on the radar in LTP for some time now. We have welcomed growth in Lepperton and as a community working hard to create a destination for local community, events, visitors to our village and a public toilet is necessary to compliment future vision for developments in Lepperton Village.

NPDC's Draft 10 Year Plan

Office Use Only: 3925

Submission No: 1714

Ian Jackson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Water metering must also take in to account the income of the household, also must be index-linked to inflation rate.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We're already 'green enough'. Prioritise water & transport infrastructure first.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Again, there are higher priorities than planting in an already very 'green' town.

Developing a multi-sport hub

Comments

I have no interest nor opinion on this proposal.

NPDC's Draft 10 Year Plan

Office Use Only: 3927

Submission No: 1715

Kay Baker

Organisation: MHNZ

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

With the water meters the water should be charged on usage not on a banded system or it is a waste of time installing meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

What about the home owners in the immediate area that already put up with festival of lights, womad, concerts, stadium activities etc. What will be given to them for the inconvenience of noise, no parking, extra traffic etc??? Higher rates for the pleasure ???

What else?

Stop increasing the rates, our incomes do not increase to match your prices. You are forcing people to move further out of town. Put recycle bins in town, or any bins would be great. What happened to keep Taranaki clean and green? That's right you didn't want to pay for another person to empty the bins. So good for the environs having litter flying into the sea and rivers. Prioritize rubbish and leave the green spaces alone.

NPDC's Draft 10 Year Plan

Office Use Only: 3928

Submission No: 1716

Karen Birch

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Factor in biennial ongoing checking/maintenance

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

An option 2.5 would have been good.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Maintain what is there but focus on infrastructure. I'd so like this to be a priority but am aware of the extra rates cost to me from basic infrastructure upgrade that is necessary and needs to be the priority. For me I'd like to see this coming in late in the 10 year plan so it can be continued in the plan after that.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

I've chosen option 3 because I would like it to go into planting our place - preferably with appropriate natives, and make sure there is ongoing funding for maintenance of those plantings.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Makes good use of wasted space. Good for youth.

Russell Wilson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

There is a real shortage of sports facilities. This hub needs to proceed as soon as possible.

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION!! I write to express my deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. I am an Employee/Business owner at Attraction Sign and Design. The intersection at Egmont Road/State Highway 3 presents a great danger to the community unless immediate measures are taken to improve the safety at this intersection. We will see a fatality! We can no longer wait to see action. Due to the busy State Highway 3' East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme risks to exit to the East against 80km/hr traffic heading into New Plymouth. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and roadblocks to incoming and outgoing highway traffic to New Plymouth. I have personally witnessed/been involved in numerous near misses at this intersection. I understand the council were to build a connecting road between Egmont Road and Henwood Road. This has not happened, and communication regarding this plan has fallen silent. I request the council urgently prioritise this issue to either: 1. Introduce traffic lights for motorists to enter and exit Egmont Road safely 2. Build the interconnecting road between Egmont Road and Henwood Road as planned NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore I/we request for the NPDC to step up and take responsibility for the safety of their citizens and constituents.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Adding water meters is going to add most to what people already have to pay out each week, some people cant even afford to pay rent etc let along a water bill every month

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

The walkway should end at Waitara.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Who is going to be paying for the new electric cars that the council will be driving around in, had better not be going into the ever increasing rates.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I cant see why in all honesty the land that is opposite Hickford Park that is never used cant be used for this.

Submission No: 1721

Rebecca Willy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Yes, paying for water only affects the poor and benefits the rich. The rich will continue to use just as much water, as the cost is not an issue for a higher standard of living. The poor families however will likely avoid using too much water because of the cost. It is a policy that makes the poor poorer and the rich richer

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

No, but I wish we could have subways or undergrounds like in Europe to get from A to B - making it easier to use public transport

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Make sure there is plenty of parking

What else?

Bell Block needs some more consideration please. Rooding heading into town from Bell Block on weekday mornings is hideous. The turn off to get onto the motorway into town was built under the old road rules of cars turning left having to give way to those turning right. Now that cars turning right have to give way to vehicles turning left, it causes major backlog, not to mention the round-a-bout that is also there. It is too dangerous to go alternative ways, such as turning from Wills Road instead. Bell Block is growing significantly and this needs addressing urgently. Another access route directly into Fitzroy from the Valley would help a lot. Bell Block could also do with better access onto the beach for kids/families.

Julia Jones

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

The 'plumbing' as you call it should never have been allowed to get to where it is now. I would call it criminal negligence of monies from Taranaki residents. I believe all big ticket items other than the 'plumbing' should be put on hold and your energy should be put into 'plumbing'. We have a great source of water in Taranaki and it is only your lack of management and storage and forward thinking which causes problems. I do not agree with compulsory water meters as it causes more financial problems for lower income households and it will not change the habits of more wealthy users. A bit of blue sky thinking.....how about replacing all the water guzzling old toilet cisterns, education, change attitudes ie 'why shouldn't I run my hose for hours, the council wastes so much water through leaks they don't fix' etc etc etc

Saving water and water meters

Comments

I cannot tick any of the options above. See previous comments on the 'plumbing' page.

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Until you fix the 'plumbing' no further expenditure on these items. Maintain what we have, if you don't fix the infrastructure the lives of people living in Taranaki will deteriorate and visitors will not come.

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

At this time I feel all expenditure should go towards sorting out our infrastructure. People come here for outdoors. What we do need is somewhere for families, children to be able to access when the weather is inclement. There was only place, the Rumpus Room, which was privately run. Surely something could be put together which families could use for various things, not just sporting events.

What else?

Taranaki is an amazing place to live but with yours and previous councils mismanagement this could change. I feel your plan is increasing the rift between the haves and have nots in Taranaki. How on earth do you think people on low incomes, pensions are going to find the extra monies you are demanding.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Why have left it so long . Stop spending money on luxury items and why are we paying to re do rugby park . Some one should be held accountable for this white elephant. I do not believe we should take another massive rate rise because of your lack of money wasting again .

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Penalise those who use the most . Stop picking on low end users at the cost of others . Thieves.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

Hello this has been happening for years. You have taken rates this whole time. About time you put that money back in . Wake up .

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Spend the money on infrastructure instead of these luxury items again . Get the basics right . About time you brought the rocks back to Onaero and replaced the wall you stole many years ago to stabilise your town . You take our rates with bugger all in return . Thieves again .

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

You keep spending money on shit you don't need . Electric cars are a joke . 5 years time when batteries die out you will do it all again . More toxic waste we don't need .

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

What . Why the hell are you pissing round with rugby park then . It was claimed we could have international cricket at the ground and sold as that , that was another lie from the start . You couldn't build that one properly so have no faith in the next venture . Fix the god dam shit roads we have and do it properly for a change . Get the basics done first .

What else?

As from my previous comments sort the basics out first. Do it once so we do not have to keep revisiting these issues as the cost just keeps mounting . Our rates keep mounting up and for what . So we can pay for your poor decisions. Over your piss poor recent roading campaign 3 of my 4 family members had to replace car windscreens and the roads had turned to shit by the next day . Don't these guys no how to fill a pot hole in . Biggest money waster out. Sack them and get someone who knows what they are doing. Stop wasting my hard earned money .

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I believe some of this money should be put into developing Pukekura Park sports ground further. The facility is iconic and with some love, could and would be a rediscovered gem of the NZ sports scene. Backing onto the park itself and with the views to the mountain and sea, it's an exceptional asset. Some clever planning is needed to find the space to widen the ground itself but it is a wasted resource / attraction at present. Would be great to see international cricket, rugby, league, tennis(?), military tattoo's etc. return to the ground. User pays and I believe they would if the premises was first class.

What else?

Thanks for the opportunity to comment. Keep up the good work.

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

As well as the hub at the race course site. NPDC should strongly consider investing in to the long term future of Pukekura Park Cricket ground, in particular the facilities. After working in first class cricket over the last few years, the changing rooms at Pukekura Park are arguably in the worst condition of those at grounds used throughout the country. Small, pokey and cold. Players and staff do not enjoy using them, which is stark contrast to how much they all enjoy playing at the venue and visiting the region.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION I write to express my deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. I am a business owner at 19 Oropuriri Road. The intersection at Egmont Road/State Highway 3 presents a great danger to those in the community unless immediate measures are taken to improve the safety at this intersection. Due to the busy State Highway 3 East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme

risks to exit to the East against 80km/hr traffic heading into New Plymouth. Although often traffic is clearly exceeding 80km/hr which is adding to the safety risk. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and roadblocks to incoming and outgoing highway traffic to New Plymouth. I have personally witnessed numerous times close calls, and twice had to take evasion action to ensure I was not hit by vehicles pulling out of Egmont Road turn East, in a hurry. I understand the council were to extend Oropuriri Road into Henwood Road, this has not happened, and communication regarding this plan has fallen silent. This extension would reduce the risk as many would take this route when traveling East. I request the council urgently prioritise this issue to either: 1. Build the interconnecting road between Egmont Road and Henwood Road (extend Oropuriri Road) as planned 2. Turn the Egmont Road/State Highway 3 intersection into a roundabout NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore I request for the NPDC to step up and take responsibility for the safety of their citizens and constituents.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Just curious as to how many assets the NPDC owns and how much of those assets can be sold to fund for this?

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We do not need water meters. We need better pipes and possibly another storage facility. Most notably, Taranaki and New Plymouth is quite 'wet' compared to the rest of New Zealand.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Is this money separate to what is coming out of the leasehold sales?

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Do we need more parks. Specially when some of the tracks on our Maunga and its brothers are hard to get through due to poor management. Whilst the idea is great the upkeep and cost is disasterous for the ratepayer.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

It should be built in Inglewood or Stratford. Rugby Park should be demolished and this new 'multi-sport hub' then takes its place. Rugby park use to be an amazing venue when it use to cater to more than just 'rugby'...

What else?

Ratepayers are tired of constant increases over and above inflation. Already house prices are driving these up so how can you justify ever increasing rates. Reign in your wasteful spending!!!

NPDC's Draft 10 Year Plan

Submission No: 1752

Jessica Allen

Organisation: Central Roofing

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 4048

Submission No: 1753

Robyn Adam

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Simone Hayward

Organisation: Wellness Solutions

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

you should've fixed it a long time ago

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Taranaki has huge rain fall every year. Spend the money on building water collection facilities instead.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The walkway needs more toilets; seated and shaded areas too. We also need food and beverage vendors along the walkway.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

It needs to be done now!

What else?

I live in Inglewood and we desperately need a zebra crossing or traffic lights on Rata street outside the high school.

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION I write to express my deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. I am an Employee/Business owner at West Coast Marine. The intersection at Egmont Road/State Highway 3 presents a great danger to the community unless immediate measures are taken to improve the safety at this intersection. We will see a fatality! We can no longer wait to see action. Due to the busy State Highway 3' East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme risks to exit to the East against 80km/hr traffic heading into New Plymouth. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and roadblocks to incoming and outgoing highway traffic to New Plymouth. This intersection scares me every time I have to use it. I understand the council were to build a connecting road between Egmont Road and Henwood Road. This has not happened, and communication regarding this plan has fallen silent. I request the council urgently prioritise this issue to either: 1. Introduce traffic lights for motorists to enter and exit Egmont Road

safely 2. Build the interconnecting road between Egmont Road and Henwood Road as planned NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore I/we request for the NPDC to step up and take responsibility for the safety of their citizens and constituents.

NPDC's Draft 10 Year Plan

Grant Crowe

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

What is it about "water network" that needs fixing to explain the numbers? What is the current budget for maintaining the water network? You cant expect a general home owner to know what this all means so explain the issue and etc like a plumber would, might help justify the costs

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

As it stands there is a standard rate for water that is covered by existing rates. There is no mention on proposed cost per liter etc can someone explain how that will work? Meters in Aucks can turn around and cost a lot when changes are made, this a perk moving out of the big city

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This will do nothing without tourism advertising otherwise it only befits locals wanting a different path to get to waitara

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

implement Planting our Place costing \$200,000 per year sounds good but electrifying our NPDC vehicle fleet is not worth it since NP is still investing in the charging stations etc

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This is a big wasted space, this race track could go else where. this is a great idea as it will bring in \$\$ to the region

What else?

The values on houses has risen like 23% in our regio, the council will cash in on that + the number of new house = more rates so we're is all that new income going? EG not sure what time council valuations are but there not going to keep them the same. My grandmas old granny flat in westown 2br 1 bath 1 car auctioned for 605k but RV is 440k I'm sure you'll increase that and so you get more rates + the rates increase. Was this factored in?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

What assets need fixing first . NDPC looking at new dryer down waste plant you say cost over \$40 million build . What happens when we more into green energy and gas turns off . Dose it become big white elephant .

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

NPDC your 3 options . If you put water meters in is this extra cost 2 working class person like many people in New Plymouth . What about old and poor who cannot afford pay .

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

How much NPDC putting rates up more than inflation pay rates

NPDC's Draft 10 Year Plan

Office Use Only: 4132

Submission No: 1774

Dave Pool

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We already have a wide range of great facilities here. Why not look at upgrading any areas that are needed before spending \$40m on a brand new hub

What else?

As a first home buyer last Dec, with the way the market has been and after the COVID lockdown situation. I feel that an increase of this size over the next 10 years will make it very hard for people like me in this situation to be able to maintain a balanced life. I've been working in my industry for 15 years and am fully qualified working 45-50hrs a week, no dependencies, bike everywhere instead of drive and have only jst made it to the point of being able to purchase a house and just make it by each week. With rates increasing at this rate I fear that I will not be able to continue owning a home, let alone use the extended walkway/tracks or sports hub that you have proposed if I am needing to work an extra 10hrs per week just to make sure I can make all my payments.

Kelly McIntosh

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Tracks and Trails are what make New Plymouth a lifestyle leader in New Zealand, they attract visitors and domestic migrants to our region and as a result have economical benefits beyond what would be expected by a 'free' service/ attraction. Fully support investment in these services, and thoroughly enjoy using New Plymouths outdoor attractions.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

New Plymouth needs a facility like this, this would be a fantastic outcome.

Comments

Wait until electric vehicles are more affordable / common

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Do we need a new multi sport hub , we will lose the racecourse . There are plenty of available basketball courts already in New Plymouth, we will not be able to host the same events as palmy as everyon likes central location of palmy

What else?

We need a large roundabout at the corner of egmont / SH3 . It is extremely dangerous / difficult intersection. I witnessed a crash the other day - luckily no one was seriously hurt but if the timing had been slightly different it could have easily been a fatality or 2. Easy fix
