NPDC's Draft 10 Year Plan

Office Use Only: 7069

Submission No: 2901

Raewyn Sullivan Brown

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Comments

Don't want water metres. Maybe fix some of the obvious big leaks around the city. Eg on corner of Cumberland and Heta Rd. In full force today and any other rainy day

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Would be a real asset for the city and all its potential sports people including kids. Much better than the white elephant of the Yarrows Stadium !

NPDC's Draft 10 Year Plan

Office Use Only: 7071

Submission No: 2902

Hayden

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

Need a round about at Egmont Road intersection

NPDC's Draft 10 Year Plan

Office Use Only: 7072

Submission No: 2903

John Lynskey

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

My preferred option is not available. Too much emotion and subtle brainwashing around this topic pushed by media and supported by Council. Yes I'm all for a multi-sport complex but I know it can go ahead and with the Racing Clubs support WITHOUT building a stadium within the racetrack area. You talk about preserving greenspace and here you want to destroy it. Build a stadium alongside the exciting one and almost under the canopy of the trees within the park NOT in the middle of the racecourse. So awesome on a flight that takes you over NP to see the precious Greenbelt central city. How many councilors or senior Council staff have made the effort to get out of bed to be at the racetrack at 6.00am to witness the countless number of people who are working horses and supporting the whole training effort. These people are becoming totally demoralized.

What else?

Have already expressed my view re multisport stadium but so over 3yr children making pleas on the radio then one of your councilors gets a whole front page anti racing pro stadium article in the local paper right when you were conducting a survey on the topic. Racing Club were granted a right of reply once the survey was completed. This is unprofessional emotive rubbish by some of your team. I expect fairness and proffisonalism from paid staff and elected councilors.

Submission No: 2905

Fiona Parkinson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

In addition to the above, it is important to keep all tracks, parks and trails well maintained.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Priority should be given to infrastructure, projects that are already underway and maintaining current resources to a high standard. This is a "nice to have" but definitely not a priority.

What else?

I have observed that public areas such as entrances into the city are not maintained to the level they have been in the past. I notice this in particular when returning from other centres which seem to be much better maintained, tidier and more attractive. "We don't get a second chance to make a first impression" and I think we are being let down in this regard.

Submission No: 2912

Viv

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Do not spend our money on a new Sports Hub! Give our rates a break!

Saving water and water meters

Comments

How about working on creating another water catchment/treatment area. I believe volume is not our problem but storage is.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Clean them up, get rid of the gorse, woolly nightshade, bracken. Along with other pests, consider rabbits as well

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

As per my previous comments, clean up council land and tracks

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is a poor use of rate payers money. Utilise the sport areas that we already have. You have already spent millions on Rugby Park!!! Put the 49 mil into existing areas.

What else?

Use our money to update and beautify what we already have. Our city centre has many empty buildings, look at utilising the Mill ... Get our roading and traffic problems sorted properly. Get our recycling ability more functional. NO TO THE SPORTS HUB

Sharon Jones

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Up the conservation game and encourage people to catch their own potable rain water for gardens, washing car, etc and perhaps Council subsidise the cost (that would be used to buy/install meters) to do this or offer materials needed at bulk purchasing prices as an incentive. Water falls from the sky, we already pay for the use of the infrastructure in our rates, stop allowing more and more housing that is putting more and more pressure on the infrastructure. Allow the building of new infrastructure assets to catch up with growth. New houses could include potable water systems too. If metering comes as a user pays then this should be done fairly and not be a double-dip for Council to grab money from rates for water AND from metered costs. Monthly thresholds could be introduced on meters based on occupancy numbers (updated as changed) so that when your allocated 'free' water is consumed then you pay over and above that threshold - this way people will learn to conserve water better when they know they will have to pay. A warning when they are nearing their threshold.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Comments

A nice to have - but don't we have much higher priority issues than this - maybe some additional investment in tracks and trails

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Comments

Go back to the drawing board. There are very adequate sports hubs in Inglewood, Stratford and Hawera - if you include all the features that these hubs have then you take away events from these smaller towns (not so much Hawera) share the love. We do not need a hockey turf - Stratford is just 25 mins away which is nothing (when you consider distances someone in Auckland would have to commute!). Yes replace the netball, courts and whatever else is fundamentally necessary, but surely this could be done at the existing Yarrow Stadium site that is now well and truly under-utilised and you are already investing millions into this upgrade. Surely that can be redesigned to include a multi-sport function that complements the Inglewood/Stratford/Hawera hubs as a region that can cover all sporting type events. The racecourse could remain or the racing club could merge and use the very adequate and lovely Stratford racing grounds for the number of events they now hold.

NPDC's Draft 10 Year Plan

Submission No: 2915

Shirley Hunt

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This has been left for too long despite the push for more people to come and live and build in our city. If this was my home I would not have left a basic need such as this until it became a critical need.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

It would be hoped that placing further responsibility on the home owner to have a conscience around their use of water - that it is a precious commodity that we need to protect and respect. With these consents for new buildings I would like to see the council taking a stand on all new buildings having water tanks (or similar) as we have a large rainfall throughout the winter months. I would also like this to include solar panels installed on all new builds.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

A long standing concern for Waitara residents.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Whilst I am a regular appreciative user of the walkway, I believe this fits into the want basket and is not a need at this time. We all live on budgets - needs and wants - Needs are the basics and if there is money over then it gets saved into the wants basket. I do not wish to be paying higher rates (as this will add to my needs basket and take away from the wants (savings) basket). Many of our people are struggling to make ends meet currently and it is insulting that you believe a want to be more important than being able to feed our families - this is the only area extra money can be taken from. So please consider this as a want and can come only if there is surplus (savings) without raising our rates to the amount proposed. Also, the mountain to sea promoting our city is marred by these Toanga being desecrated with sewage, rubbish resulting in our people being unable to swim in the rivers or sea, a definite reduction in sea and bird life etc. Lets get the priorities right before we look at want projects.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Its a start!! Maybe buses, trucks etc could be encouraged to look at filters on their vehicles to reduce emissions.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is also in the want basket and something that I do not wish to struggle to pay higher rates for. In my years working in the community with lower socio-economic families I have seen hope and values within the use of small community sports clubs/halls where people of all ages and skills come together to support each other and their children whilst building happy memories and friendships. This is with committee's, fundraising ventures etc. I also value this resource and believe that a large hub will impact on these communities. Has a study been done on how this will impact? I have seen our community halls rural and city become defunct due to these types of large projects, will this also have a similar effect? No I do not wish to pay my hard earned money towards someone else want list!!

What else?

For too many years this council has strived to make our city a place for tourists to enjoy, often spouting the city to mountain angle. Walkways, art galleries and other installations at too big a cost to our environment and families. Our families do not have expendable income to pay more to go to the aquatic centre, instead we enjoy the beaches and rivers, parks and bush. This summer many times we have not been able to swim in the sea or rivers, both of which we have noticed a deterioration in life and cleanliness. These and our community/families are our biggest assets and they have been systematically eroded over the last 20 years in favour of wants. Time to get your priorities right - needs to be addressed - wants to go in the savings basket if and when there are extra funds - not from raising already struggling families rates!!.

NPDC's Draft 10 Year Plan

Office Use Only: 7136

Submission No: 2916

Rob Foster

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Is the extra cost from metered water included in the projected rates increase? Or is it another extra?

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Need more picnic areas with shelters.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 7140

Submission No: 2917

Georgina Todd

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Essential for health, safety and reducing wastage

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Low income families should not have to struggle to afford water usage

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Need to attract tourists to the region and residents to the outdoors

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Needs to be eco friendly build. Decent public transport to access it

What else?

Public transport is dire. Needs to be significantly improved to get cars off the roads

NPDC's Draft 10 Year Plan

Office Use Only: 7141

Submission No: 2918

Michael Carr

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I have real concerns about the total investment that is going into this. Every council seems to be wanting to do the same thing. How will we have the workforce and resources to complete this scheduled work being proposed? Is this going to be the core function for councils moving forward or will this be taken over by a commercial model? Too many question marks to feel confident about the investment being proposed for me.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

A water saving plan is important and I can see how water meters would play a role in this. As long as water meters are used by council as intended and not used as a revenue stream once they are in place.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

This is a problem that has to be addressed.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The Coastal Walkway from Bell Block to Waitara - it seems a shame that this is no longer a coastal connection. I understand the reasons why but are there other alternatives that could drop the cost and provide a link between Waitara and Bell Block? There needs to be a link between the two areas and ultimately access completely along the Coastal Walkway. My question is how much is reasonable for this connection? I think tracks and trails throughout the NP District and Taranaki are a superb investment for our community and would have a wider reaching effect of people from outside our region getting to see the beauty that Taranaki holds.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

This is a difficult set of options for me. I think implementing Planting our Place costing \$200,000 per year is absolutely the right thing to do along with continuing to work on the CAF. I am not convinced that electric cars are completely the right thing to do at this stage. Could there be a better use of the 1 million dollars here? Less investment in cars and more investment in a project that has a greater impact on our climate?

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

A multi-sport hub at New Plymouth Racecourse has been a long time in the making. Now with growing sports struggling for space, a regional strategy in place and a need for community assets that boost public health the time is ripe for development. The hub will solve community sporting issues while creating a multi-generational asset where everyone can connect and get active. This is a NEED! This is based from a robust needs asset as well as connecting into so much other research to support improved wellbeing outcomes for our community. To truly advance the notion of NP being the sustainable lifestyle capital of NZ it really does need the proposed facility / community space to achieve this. A place that is bubbling everyday with people from all walks of life who can feel safe, connect, try, compete, develop, observe, be. A place that feels welcoming and accessible for those of different cultural backgrounds and those of different abilities. A place that is on their way between school, work or home. Our third place.

NPDC's Draft 10 Year Plan

Office Use Only: 7142

Submission No: 2919

Maryann Lemon

Organisation: Tropic of Orchid Ltd

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Provide more transparency on the portion of water used by farming and businesses versus residents. Dairy farms use huge amounts of water and must pay their share. I am not opposed to water metering for residents but expect Council to provide information that shows we are paying a fair share for our usage, rather than overpaying to subsidizing the farmers.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

While long tracks such as the coastal walkway are nice, we need to more attention paid to the core service of helping people walk and bike safely around town. The means providing greater connectivity between existing trails and tracks across our communities. Connect the trails we have with more bridges and underpasses across busy roads, to make these connections safe. Trails and tracks have so many lifestyle benefits and reduce our dependence on cars. Please spend up!

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Eliminate a portion of the NPDC vehicle fleet and provide electric bikes to the staff. Find other ways to reduce NPDC dependence on vehicles. Implement a programme to replace Council maintained turf grass with native alternatives to reduce mowing and maintenance costs and improve biodiversity in ground covers.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

More sports facilities are needed in our growing community but not so concentrated in one place. What about locating some of the fields in other parts of town, to improve accessibility? That would also reduce a heavy burden of "drive to sport practice" car trips and traffic problems in the area. A smaller facility would also free up some of that prime real estate for apartments or townhomes to address the housing shortage. The rationale for a complex so large is not clear and the public was given no chance for input on possible options. Come back to us with a few choices and I will be more supportive!

What else?

Please provide more detailed information about how NPDC is spending and controlling its operational and staff budgets to alleviate rates rises.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Comments

Its a bit hard to believe we are use up to 60% more than other places - can you confirm leaks in your water pipes are not contributing to that given the pipes are in such poor condition ? I don't believe water meters are the answer & I totally oppose the introduction of them. I read that previous feedback showed that less than a third I think it said but still a low number supported introducing them so what does that say. Spend the money spent on installing them on building another water reservoir.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Spend the money on the necessary infrastructure - water pipes. Although I love the tracks the bottom line is its a nice to have rather than a necessity.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I agree with this but am horrified with the idea of building the hub within the race track area. I think this is pure arrogance on behalf of Sport Taranaki with the support of the council. You are trying to achieve your desired outcome by stealth. By all means have the turfs, courts & playing fields within that area but the building has to be outside of that area & alongside the TSB stadium. I thought years ago it was the Racing club who gave the council the land & in return the council gave them the lease. The racing club may have changed their name but they are still the same entity and I'm disappointed in the bullying tactics you are displaying in trying to 'turf' them out. Very disappointing and I hope any legal challenge rules in their favour but I guess you will spend valuable money fighting it - money that could go towards infrastructure. There is room for all.

What else?

Sadly we are losing confidence in the Council who do seem to have their own agenda.

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

If you do invest in the facility, you should allow multiple use, such as for creative and community activities, not just sport. We are one community.

What else?

Building a regional arts, creativity and culture development agency for Taranaki In 2020, Creative Taranaki conducted a regional online survey with 254 respondents: 92% - support or strongly supported establishing a regional arts, creativity and culture organisation 87% - supported or strongly supported developing a website and social media 89% - supported or strongly supported writing a regional arts and culture strategy 95% - supported or strongly supported having a database and network of Taranaki artists, creatives and cultural groups

First, we would like to congratulate the Council on its support of two towering cultural organisations, the Govett-Brewster Art Gallery/Len Lye Centre and Puke Ariki. These landmarks are important to us. However what is missing is the community connection to local arts, creativity and culture. Who will write a regional strategy for arts, creativity and culture, that takes into account multiple disciplines of practice, is intergenerational and multicultural?

Therefore, we would like to submit the following as our submission to the Long Term Plan.

1. We contend that Taranaki needs a funded organisation that can:
 - Leverage investment into the arts, creativity and culture sectors across Taranaki
 - Create a strong and vibrant regional creative economy by enabling skills, knowledge, resource and capability building initiatives
 - to facilitate all our arts practitioners and organisations to be self-sustainable and thrive.
 - Enable collaboration between arts and culture groups and organisations, ensuring efficiencies, allowing them to have better capacity and capability to deliver more for the community.
2. Most other regions in NZ have an arts and culture strategy along with a lead organisation that will drive and champion the vision and deliverables of a strategy. Taranaki is behind other regions in this regard.
3. There is also a need to activate strategies and programs to connect, upskill and empower local artists and creatives so they can succeed locally and beyond the Taranaki region, ultimately allowing our grassroots artists to help grow our local economy.
4. The lack of a regional creative development organisation means as a region we regularly miss out on national funding opportunities, and presently are unable to achieve efficiencies through collaboration and the sharing of resources.
5. We therefore contend that the Regional and District Councils need to fund and support Creative Taranaki, and organisation that can facilitate and drive the above initiatives.

Over the past two years, we have grown into an organisation with 214 arts, creativity and culture individuals and organisations, 33 regional supporters, nine Lead Team members and 7 part time employees.

We are all working for the betterment of Taranaki and it's community. Pasha Ian Clothier, Andy Bassett Elvisa van der Leden On behalf of Creative Taranaki

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I believe we have sufficient walkways and tracks for the present time and this money should go to other higher priority and urgent needs like the sports facilities and water upgrades.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Would like to see what your plans are for the disposal of batteries from the electrical fleet and costs of upgrading the infrastructure for charging the fleet etc.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Need to see what alternative locations and options that have been considered. I am not convinced having the new stadium within the racecourse is the best option. ALSO, I don't believe there is anywhere near enough space allocated for parking, I think this is a major problem with the current proposal. I fully support such a facility is required and sooner than your preferred option but think you need to share other options considered. I have a feeling the current option is probably the cheapest but will it fully meet NP's requirements well into the future? Maybe we need to spend more to future proof. There does not appear there is any room for further development at a later time.
