Gay Andrews

Organisation: Private individual

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Needs to be done as soon as possible. Otherwise maintenance costs will blow out the budgets. We need to forget about the nice to have stuff for the moment. Urenui sewerage scheme needs to be fast tracked. Its not good enough that our kids can't swim in the Urenui River.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Council still needs to investigate putting in more storage dams. Environmentally dams are really good for our environment. They stop all the water flowing to the sea when it rains. There is evaporation, there is permiation which tops up the water table and wetlands are also created plus there is also recreational use.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Needs to be finished. Millions spent already in Waitara.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Cannot support this at this time. Our water and roads need to be brought up to standard.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The proposal has far too many sports on the one site. There would never be enough parking for large events. Another stadium is needed but not in the middle of the racecourse. It could probably be built beside the existing stadium with car parking shifted across the racecourse. Football should be established out at Airport drive. Netball could be established there. Inglewood has a great stadium and should be utilised. The district is better to have more satellite grounds. The Waitara Sports Hub was developed by the sports community with a very small help from Council. Council also told the Hub that Council was not in the business of developing and providing sports facilities. The sports bodies need to get their act together and start fundraising. After all the ratepayers maintain these grounds after they have been developed.

What else?

The \$38 million for walkways and tracks should be spent on upgrading our roads to a suitable standard. Sealed Pavement rehabilitation at \$5 million a year is way short of what is required. The NZTA needs to be lobbied as well on this issue. Roads are having reseals done on surfaces that need rehabilitation. Trucks are going to be using these roads for ever even if they are electric, diesel or hydrogen. They pay huge road user charges.

Aquatic centre and pool charges. Childrens fees need to stay the same not increase. Children need to learn to swim and many schools do not have pools now.

The NP to Waitara highway needs roundabouts installed as soon as possible plus a 4 lane highway. Boat ramp at Tongaporutu doesn't need a renewal. It just needs maintenance. This was all built by volunteers. Unfortunately they have all passed on with no younger ones taking up the vacancies.

Disabled access at Three Sister's Carpark. Just needs steps with a hand rail. \$1000 should be all that is needed. Firstgas own and maintain the rock groins there and I'm sure if they were approached they would be willing to do something.

NPDC's Draft 10 Year Plan

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

This seems more crucial than extending the walkway, the impact on our environment would be better served by more money towards CAF

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We already have enough sports facilities

What else?

We are in need of an Arts co-ordinator/hub in the New Plymouth district. To maximize the idea that we New Plymouth are the Arts capital. Its time to put support into and emphasis on thrincredible talent and potential we have in the region. It would be great to see some sort of arts incubator structure for emerging artists to support our tertiary graduate artists and emerging creatives.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The District's current sport facilities are inadequate for our growing youth population. The racecourse is a perfect venue for the development of a multi-sport facility. However, the development will be compromised, if the racecourse remains. Each race meeting day will mean the facility will be unavailable for use (around 12 days per year). Basketball and volleyball experience this problem every season when the TSB Stadium is used for trade fairs, conferences etc. Back in the 1960's there was a Speedway track at Waiwhakaiho. The city's growth saw Speedway move to Stratford, and the sport has thrived ever since. For horse racing to survive and ultimately thrive, the Taranaki, Stratford and Egmont Racing Clubs need to work together to centralise their sport, outside of the city. The Perpetual Investment Fund has grown in excess of \$300m. Apart from using \$9m per annum to minimise rates, consideration should be given to using the fund for investment in long-term assets, like the multi-sport facility.

Option 1: Do not develop a multi-sport hub.

What else?

Where is the plan for the arts of Taranaki ? I have been running a not-for-profit, true community based, open to anyone art gallery (Gover St Gallery) for over a year now with no personal income. But with presently over 320 Taranaki artists connected to the gallery and a daily visitor count averaging 80 people a day it shows there is a huge need for this space. Everyone, locals and visitors, love it. I wanted to offer the opportunity to all artists to display and sell their work as well as highlight the vast creative skill set that is within Taranaki . NPDC needs to get behind the arts and realise what a huge asset to Taranaki it is.

Comments

Fix this up before you build anymore walkways or other projects.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

This should have been done long ago.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Get on with the job priority before any other projects.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Nice to have fix water supply and discharge systems first before this.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Once again fix our infrastructure first so we can have plenty of water and hygiene living then this.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Why carry on with the present site that is built on a swamp come on relocate to new solid ground.

What else?

Get on with the job in hand well done so far. You are building wants and not what we need.

NPDC's Draft 10 Year Plan

Office Use Only: 7163

Submission No: 3087

Michael Morrison

Organisation: Lone Leaf

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

With the increase in infrastructure spending due to Covid, the plumbing is a no brainer for anyone with an economic degree or just common sense. In order for the community to thrive in the decades to come, the plumbing needs to be fixed.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Easy choice for younger generations to back. But due to the aging population here it may fall on hard ears. Electrifying may not be the best bet as there is the possibility of Hydrogen generation here, since the petroleum industry is also here.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

This sports hub will be situated in the perfect spot for families and will reduce traffic in the main center. In regards to moving the horse community. This will inherently annoy them. But, most of the horse community is situated out of town, therefore the cost of moving those horse into town to ride is far higher than expected with climate costs. Moving them further out will not hinder their ability to ride, nor their ability to be a community. By moving them closer to nature, it can increase dopamine and serotonin whilst making the location calm and peaceful for the horses. This also means that the horse and people are kept away from motor vehicles.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

I would like road humps - speed humps, put in Whiteley st, Calvert Roads to slow the traffic down, as has been done in other dangerous streets used as a race track and quick bypass in New Plymouth.

This road is used as as race track all the time and also as a bypass for vehicles and trucks avoiding the new intersection and traffic lights in Moturoa, also the crossings during school hours. I am amazed this problem has not been rectified before now, due to a predominantly older community who are either walking or riding their disability scooters also young children through the day.

I live right on the corner and am amazed that there has been no one killed yet, although there have been many close calls also throughout the night, more so when it has been raining they do burnouts and 360s right on this very dangerous corner.

I recommend that you put speed trackers and cameras on this intersection to witness this for yourselves. I look forward to hearing back from you regarding this matter.

Many of the residents around this area are in complete agreement, this is a very important issue here.

NPDC's Draft 10 Year Plan

Office Use Only: 7173

Submission No: 3092

Ross Cullen

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

If water meters are installed there should be an amount of water that is free based on normal consumption, and after that amount is used, then fees start applying. The amount that is free per household, should be based on how many people live at the property. If people want to water their garden or wash their car regularly then they should pay. It is pretty hard to want to pay for water through a meter when the basic infrastructure has as many leaks as it does. What are the charges being considered per volume of water on a meter in relation to what is paid in the rates already?

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

No district council car from the fleet should be used by staff for personal use. Fringe benefit tax and insurance can go into the purchase of new vehicles. A council car should not be part of any remuneration package.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I agree a sports hub will benefit the community and sports groups, but this should not be built in the middle of New Plymouth on the main arterial route in/out of town. As it is, the parking for the events held there now is insufficient and the access in and out of Rogan street across from NPBH is difficult with a lot of near misses. If this were to go ahead with the reduced car parking as in the plans, we will see a huge increase in illegal parking around the area especially on Coronation Ave and a large increase in accidents and injuries through the large volumes of traffic merging with a considerable amount of through traffic. This plan has not been thought out very well and the fact that car parking at this facility will be as low as it is, is actually astonishing. I cant believe with the amount of sports events etc that are expected to be taking place there, some people haven't figured this out. Have they not been to sports events outside of New Plymouth. A sports facility like this should have parking the size of half of the race course to avoid accidents, children running in front of cars from where ever they have had to park. This money should be spent on main infrastructure first, while a new location is found on the boundaries of the main centre.

What else?

Money from the council should be spent on future proofing infrastructure first (water, sewerage, parks, trails) before we start big projects to support some of the sports teams and clubs around. We should be freeing up congestion around the main center and not clogging it up with extra traffic and chaos form a sports hub in the wrong location.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

User-pays initiatives for basic rights like water always hurt low-income families the hardest. Perhaps if the quality of the water was better a meter wouldn't seem such an imposition, but we have to pay for a filter anyway, on top of our current rates, in order to make the water here drinkable as it tastes worse than in any other city we've lived.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

According to data collected by Sports New Zealand, fewer and fewer people are taking part in organised sports anyway. At a time when residents are struggling with unaffordable housing and stagnant wages, \$40 million for some playing courts seems like a nice-to-have.

What else?

I support the proposed upgrade to Brooklands Zoo if it is required for animal welfare .

NPDC's Draft 10 Year Plan

Office Use Only: 7177

Submission No: 3095

Stephen

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This just proves why putting elected people in direct charge of vital infrastructure is dumb and reform is needed

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Option 4 is the best for our rivers. Stop water wastage.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Traverse should link to Inglewood and Egmont Village. Also focus on neighbourhood links.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Use this to turn Hickford Park into a forest with walkways for your fastest growing community

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Get rid of the racecourse, put aside land for a new aquatic centre there.

What else?

Sort out Bell Block traffic, it can take up to 30 minutes to get to town. Make sure that the Parklands ave is extended to Airport Drive before NZTA shut down the access for Wills and Mangati as otherwise it is going to get worse. Improve parks, get rid of weeds and pests. Stop half completing parks like the Mangati and the Waihowaka. Restore the Huatoki walkway rather than just closing it off. Get rid of the rhododendron at Pukeiti. Remove the cars from the CBD. It should be for people not cars. Deal with the housing crisis. Build houses. Build social houses. More buses with more frequent services.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Why do we need to save water ? Apart from a few periods of dry between mid Jan and mid march there is no significant water shortage and the current water saving measures in place work . The meter option is a cover for increasing revenue gathering . I am opposed to it as it is not necessary, there is no water shortage, if you charged for water those on low incomes would be unfairly treated . we could use the 18 million required to install the meters on fixing the plumbing

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I think new plymouth is well supplied with greenspace. Id rather keep the rate rises below the current proposed 12 %

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We have a great stadium the TSB . All sports are well resourced in terms of grounds and playing fields . The netball courts need better parking. Lets save the money or apply it to fixing the plumbing and do the right and ethical thing by honouring the longstanding agreement with the np racing club whatever it calls itself

What else?

I live on Tukapa Street . Isn't it time you moved us off Septic Tanks and offered a connection to the sewer system. I note that isnt included in your plumbing fix

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

include horses in the bell block to waitara extension

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We need to start preserving more water as we have enough rain. Could new houses have water tanks using rainwater? The NPDC need to think creatively.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

\$36 million is quite excessive. Is there a cheaper option?

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Money for Yarrow Stadium was wasteful and could have been used for the multihub. Little Ashburton has a fabulous multihub for futsal, indoor netball, basketball and all connected to a pool and gym. It is amazing. We need one in NP sooner rather than later!
