**Susan Thirlwall**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

This is a coastal town, expanding. Getting plumbing sorted is essential for coastal, beach health and connections for expansion.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Water quality is patchy but I use a filter. As long as it is "safe", taste may need a slight compromise.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

This area is improving. It is useful to have the stormwater properly under control.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

I think it is acceptable to get sponsorship for this. Tracks named after them or rich individuals etc.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

#### **Comments**

It will cost money whether we like it or not. Let's be prepared.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I think this can be put off. We need to decide when the Covid threat is truly resolved (or public/private co-fund).

---

### **What else?**

New Plymouth rates are considered high but we are happy to pay even more. NP more so than other places is like a separate world - it has "character". One concern I have is "mountain trouble" preparedness plan. It may never happen but could. Worse case is, I understand, "evacuate the province"!!

Te Amoroa Kane Clifton  
47 Ngakoti Street  
PO Box 84  
Urenui

4 April 2021

**RE: Submission on Long Term Plan 2021 – 2031 Consultation Document**

**There is a severe water issue in our community.**

**The water quality of the Urenui River is unacceptable.**

**I urge the Council to invest in fixing the sewerage issues before they consider any other spending.**

I have a long whakapapa association with the whenua in Urenui and the surrounding area. My whanau and I returned to my tūrangawaewae 9 years ago and as a Ngāti Mutunga person, we are proud to be living here on our whenua. We purchased our home overlooking the Urenui awa, and were excited about the opportunity to raise our children on the awa along with the values of kaitiakitanga or environmental guardianship. Unfortunately, the reality is contrast to this, as we cannot swim or eat from the awa.

This awa has been the life line for our people for many generations and it saddens me to think that the mouri of the awa has been affected due to raw human sewage leaking directly into the water. To think that this has been the case for many years is highly disappointing and is a direct breach of The Treaty of Waitangi. This is because it is having a negative effect on taonga species and Te Mana o Te Wai.

**Te Mana o Te Wai** is about recognising water as being an important resource that has mana. This means, that through that kinship, there is an inherent responsibility to protect it. It is the concept of personifying the awa which recognises the mana of the awa as having rights like that of a person. We do not pour sewage, toxins or pollutants into our grandmother, Papatūānuku, so why would we do it to the awa.

From a Māori perspective, there are a set of common values which denote the way Tangata Whenua connect with the environment. These include whakapapa (genealogy), mana (authority, right, and power), tapu (sacred or controlled), noa (the state of removing tapu), tikanga (practice) and mouri (life force). These values inform how tangata whenua or people of the land, place ourselves in the world, and how we engage with it.

We need to invest money into restoring the mouri of the water and to ensure Te Mana o Te Wai is upheld. I see this as being a collective responsibility, not just the responsibility of the residents, as this is about the wellbeing of the community and those visiting the river.

As a response to the leak of raw sewage, Ngāti Mutunga placed a rāhui (temporary restriction) over the Urenui River. As the person who conducted the karakia to place the

rāhui over the river on behalf of Ngāti Mutunga, aside from our kinship responsibility, this was a social response to protect the health and wellbeing of the community and those visiting.

This as an urgent social matter that needs addressing effective immediately. Once again, I urge the Council to invest in fixing the sewerage issues before they consider any other spending.

Thank you for taking the time to read my submission.

Nāku noa,

Te Amoroa Kane Clifton

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

With limited time and information it is hard to comment on the line between options 2 and 3 and what may be achievable with more insight on asset condition (such as learning from work done in the early stages of the plan or from other councils as they uncover, remove and determine the accuracy of integrity assessments on removed assets).

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

Water metering is important in providing data and a base for incentives to reduce demand in aggregate or at times driving new investment. If this is simply a billing investment, then payback will be limited. If it is to be part of innovatively rethinking how we stimulate behaviour change, intelligently engaging with and helping people to change through an integrated set of digital, behaviour change and billing solutions (matched to what is needed to reduce asset investment) then it is surprising that option 4 delivers less net saving.

---

## Improving stormwater management in Waitara

---

## Extending our tracks and trails network

#### **Comments**

Not agree with any. The focus on the tracks should be a balance of two objectives. Those that will drive 1. the most reductions in vehicle KMS travelled to enable sustainable outcomes and 2. the most cost effective investments to open up the countryside/ attractive rural cycling such as we see in countries like the UK were minimally invested in bridleways with limited signage and as needed surface improvements allow large amounts of track (noting in some places high quality surfaces are needed) - sign posting and connecting existing paper roads may be a low cost quick hit. The LTP seemed to focus on a couple of big high quality investments rather than stated outcomes and the most cost effective way to maximise KMs available to meet those outcomes (all be it the 2 projects are great).

---

## Boosting our Climate Action Framework

### *Comments*

Disagree with all options - innovation, imagination and action is needed here urgently. It feels like we will be 3+ years in to the Climate Action Framework (having used up 25%+ of the window the IPCC said we had to 2030)m, spent \$\$\$?S and done nothing meaningful. The role of council in tackling the climate challenge is critical, the clock is ticking fast and the work to date and this proposal continue to show a capacity to spend money but not enable the community to make an impact. NPDC/ TRCs investments or lack of changed investments in roading, parking, urban design, building standards, Lets Go, buses, mobility as a service, car share and other digital social infrastructures etc dictate people's choices and action, but no tangible progress is being made beyond Lets Go and active travel! The CAF may be a lovely document but is not driving urgent action (and the very little action proposed will only make things worse). I am told action needs 1. a lot of funding and 2. direction from govt. This inaction and closed mindset makes me and my tamariki angry and feeling helpless. We need open innovative thinking - as other councils are doing. Lets take EVs. I hear we are short of money to act on climate change, But we have \$1m for EVs. If EVs are the answer then as CCC has shown there are ways to get them for no capital spend, lower lifecycle costs, with an optimised fleet that reduces the embedded carbon in new cars (that is a big problem) and that brings a mobility as a service solution to NP to help other cut emissions at no cost. As presented to council staff and councillors before, simply buying EVs does not solve the problem - the embedded carbon in the new cars means we will increase global cumulative CO2 initially (a big problem) and reduce them by the 2040's less than 10% (too little, too late). We need to reduce vKMT another way - as CCC are doing intelligently. This then free up a good chunk of the \$10m for the LTP to get on with investing in other low cost solutions that really help - promoting car sharing whilst making CBD parking far less attractive. We need to also see what the additional \$150k is to be spent on - if it is more staff writing more action frameworks without real carbon reducing actions (or worse ones aggravating the problem), then we are wasting money, opportunity and our tamariki's future. It is hard to see on this pressing issue how our governance body and executive are meeting the new standards on governance responsibilities set out by the Task For For Climate Related Financial Disclosures or their moral obligations for tamariki, papatuanuku and future generations. This section has been written with input for one of my (angry) teenagers!

---

### **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### *Comments*

Whilst I support the aims and goals here, planning must wait 3 years so council free up capacity to start innovating and substantively acting on the critical needs for carbon reduction and enabling our community to act on it.

---

### **What else?**

The timing of this consultation narrowed down to just 3 options only months from the start of the financial year, give the impression this consultation has been framed to deliver select outcomes rather than get deep engagement with time to act on the feedback. For this reason I have decided not to waste time speaking to my feedback. As noted, this feedback represents the passionate inputs from my tamariki looking to their uncertain future.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Do It once, with the properly 'designed for the job' equipment and materials NOT the cheap plastic stuff that breaks down in 10years. Installed by people with nous and common sense.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

It is essential to have water meters. We have become too complacent with our -past -abundant rainfall. And not keeping up with supply to new subdivisions. We need more storage tanks; both town water and residential buildings. Ensure EVERY new build and retrospectively where practical water tanks for roof catchment. Even if only for toilets, washing machines and garden use.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Gradually move the town to higher ground ??

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

The tracks and walkway are Great. Thanks to folk with the foresight to construct them. Gradually extending them is a good idea. Maintenance could be an issue. Need folk with good observational and physical skills to do the work properly. ( That goes for all 'works' really !)

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Are you ALL really sure about electric vehicles.?? What about the manufacture, life and disposal of the batteries. Is there any push for the engines run on water that have been quashed over the decades by the oil companies. (Do you younger folk even know about them?) Yes to more tree planting -But wisely please -Not kauri, pohutukawa and rewarewa as steet trees! Yes too to more sand-dune protective plantings. And Yes of course they need funding -but your options above didn't give me option to say yes to funding planting but no to electric cars (They seem a good idea in theory ---!)

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Of course we need a multi use sports hub. The land is there.-- Just get on with it !!

---

## What else?

On the whole the Council does a good job but there are some whose egos get the better of common sense for the whole District and the folk that voted in and employs them!

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### *Comments*

We have been on a water meter for several years and it certainly makes a person think about water usage.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Waitara has a sports complex. This could be further developed if necessary and used by the New Plymouth community. The Waitara complex is probably not viable for all the sports, but if it was able to be used then it would not be necessary for the Council to spend so much on a New Plymouth facility. I'm sure there are cheaper options. I hope the Council will seriously reconsider the proposal for a one stop sports hub. The outlying communities have much to offer and it is not an inconvenience for people to travel from NP to Waitara

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

How come i went from the Intersection of Devon Road / Egmont Road to answering questions about Plumbing.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

No new EV until you can sort the existing ones out, and have them so they can cover the same area a fossil fuel vehicle does.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

#### **Comments**

Remove the Old horse racing coarse or incorporate this with a multi use event centre / park not only is it an eye sore at present it needs redeveloping.

### What else?

I find it hard to believe that past NPDC Infrastructure Managers didn't keep Mayors and Councillors up to date and informed on the rundown state of our plumbing. This is their primary job, to inform and make recommendations to the council on the portfolios they manage. I also note that the former long-serving NPDC Infrastructure Manager Anthony Wilson has been appointed to the board of the newly formed Government water services crown entity Taumata Arowai, the new three-waters regulator for all Aotearoa. I'm sure he will be pleased to hear that he failed in his duty to the NPDC as their infrastructure manager at the time, leaving our plumbing in such a bad state, or are we suggesting the previous Mayors and Councillors are at fault for not listening and taking his recommendations onboard. I understand the new crown entity is to be passed by parliament in the 2nd half of this year 2021. Wouldn't it be prudent for the NPDC to wait and see what funding is available to local councils from Govt through this newly formed three-waters entity Taumata Arowai before proceeding with the planned rate rises?

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

"Our water network is run down, and we've been underinvesting in it for many years. It's a backlog that we need to get on top of to avoid more frequent water outages and sewerage overflows."... Your statement speaks volumes about mismanagement ... fix that problem also, by removing those who are not capable of seeing the bigger picture. How can you keep providing new consents to develop and build new industrial and residential areas without a significant thought to essential infrastructure? Rate payers have been paying for the infrastructure to be maintained properly in accordance with the core services council is responsible for. What has that money been squandered on? Now rate payers are to be burdened with multiple rates hikes because of this mismanagement, along with the councils desire to fund the "frilly" things that no honest council should not be prioritizing while they have so many underinvested core areas to deal with.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Given the appalling state of some of the inner suburban walkways - weeds seldom cleared and the lazy and toxic use of glyphosate spray to control the mess when someone gets round to it, even near water ways! I do not approve of investment in new areas until such a time the NPDC and their contractors take the current situation in hand and return the road sides and common areas to the former glory or being regularly cared for and something we can be proud of. Transit NZ is also letting our region down with the placing of road cones, left at time for months, rather than just getting the clean up done! Obviously not enough funding going to the "coal face" of need. Are your department too top heavy with office workers? New Plymouth used to be such an attractive place.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

It is of importance but I believe Council must fix it's core failures before investing in distractions to those long overlooked essential services.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

When a basic household has a minimal budget to work with they are best advised to streamline, cut back and focus ONLY on the core essentials. The development of any community-based entertainment facility is best left to the sporting bodies themselves - to Benefactors, bequests and fundraisers - NOT rates increases. This is NOT an essential service and should be well down any priority list given the current economic situation. Perhaps NPDC could donate a land asset towards a sports facility, and waiver resource fees etc. BUT NO RATES MONEY.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

This should be a priority. This is core business. This should take precedence over Len Lye, Art in parks etc. Sort your priorities out. Roads, Water.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

Why do we use more water? Is it because of the neglected leaky pipes? I don't think we shower more than anyone else? Please explain where the opening statement came from. This is Priority business, not Len Lye etc.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Use the proceeds from sale of leasehold land in WTA to benefit WTA.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Long overdue.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Very expensive trees. More info required. Exotics? Native forest? Is this just lake mangamahoe forest which should cover its own costs anyway? Electrifying the fleet should be net positive due to reduction in fuel costs.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

No need for another White Elephant. Yarrows stadium was sold as a multisport hub, we got a Rugby stadium which it turns out isn't even fit for purpose. Do not wish to see another similar debacle.

---

## What else?

Stick to the basics. I see no mention of the proposed 11M for the purple palace.... Money is going to get more tight, Methanex winding down , the oil industry is over. People cannot afford endless rates increases over and above inflation. Alternative energy is the future but the Councils job is to deliver the basic essentials, not vanity projects. Over the years the mismanagement has been almost unbelievable. The sale of TrustPower, ending up as a losing venture in Tasmania. Yarrows Stadium. The lack of investment in basic infrastructure. The Leasehold rip-off of the Waitara people. Len Lye being subsidised by the ratepayer. The unnecessary Airport "upgrade" The only good project has been the coastal walkway.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Active encouragement of home water collection for garden use will reduce both water consumption from municipal supply and stormwater flows.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Fixing leakage will result in significant reductions. I would hope that rates would be adjusted downwards so that a household using the average amount of water would pay no more than before metered charges are applied.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

The long term viability of low-lying land in Waitara will have to be considered in the context of sea-level rise, with the possibility of managed retreat.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

I would rate the Taranaki Traverse, particularly the segment across the Patuha (Kaitake) range as the higher priority.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### *Comments*

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

I would have supported a multi-sport hub over and above Yarrow Stadium, but we are stuck with paying for the stadium. One concern is what effect the hub will have on

- 1) camping for WOMAD and
  - 2) Parking for major events such as concerts at the Bowl of Brooklands
-
