

The New Plymouth District Council Home Energy Scheme assists ratepayers to install insulation and/or clean heating systems in their homes.

A service provider will assess your home free of charge and provide options to fit insulation, clean energy and heating products. You may wish to get more than one quote.

The service provider will discuss with you the funding options available through EECA, our Home Energy Scheme payment via a Voluntary Targeted rate (VTR) or other funding options, such as your bank.

The following is a list of registered suppliers approved by New Plymouth District Council (NPDC) for this work.

NEW PLYMOUTH DISTRICT COUNCIL APPROVED INSTALLERS

Further information

1. If you choose to apply for financial assistance through our Home Energy Scheme, you will need to complete the application form, sign the agreement and send it to us. The application form must also include the service provider's quote, the product, the product specification (not required for insulation) and the \$200 administration fee.
2. If your rate payments are up to date and you meet all other eligibility criteria, we will approve your application and confirm the amount that will be added to your rates.
3. For solar hot water heating and fireplaces you are required to apply for a building consent.
4. You can then advise your service provider that the work can be undertaken.
5. Proof of the completion of works will be required from the service provider. In the case of the installation of clean heat products, solar and heat pump water heating, and other installations which require electrical works, the installations must be undertaken by a registered electrician.
6. Following the installation of solar hot water, an inspection by NPDC may be required as part of the building consent process.
7. When the installation has been completed, the service provider will invoice EECA (where an EECA grant is available) and NPDC - each will pay the agreed contributions to the service provider. You will be responsible for the payment of any outstanding amounts to the service provider.
8. NPDC will add the additional rating increase to your property's Land Information Memorandum (LIM).
